

Multi-Contact and REACH

Multi-Contact is well aware of REACH (EC 1907/2006) and its consequences. Multi-Contact has every intention to contribute to the continuing process for obtaining a cleaner and healthier environment. We are continuously improving our products and processes.

Per definition of REACH, all products manufactured or imported to the EU by Multi-Contact are articles (REACH article 3, point 3). No Multi-Contact article contains any substances intended to be released during normal use. Therefore Multi-Contact has no obligation to make any registrations of substances (REACH article 7).

Multi-Contact is monitoring the further development of the SVHC (substances with properties of very high concern) list in Annex XIV, and the candidate list. If any such substances were identified within our articles Multi-Contact would take every effort to find less dangerous alternatives without impairing the high quality of our articles.

Place/Date of issue

Allschwil, 3 March 2009

Signatory (Name/Function)
